

Tom Lenehan

FULL STACK SOFTWARE ENGINEER / BUILDER | Product, AI & Solutions

Philadelphia, PA | 973-865-3494 | Lenehan3@gmail.com | TomLenehan.com

A builder with 14+ years of experience turning complex problems into intuitive solutions. Taking products from initial concept through technical design, delivery, and ongoing improvement. A strong communicator who bridges customer needs and business goals with technical execution.

CORE STRENGTHS Product ownership • Technical communication • Solution architecture • AI/LLM • APIs & integrations

EXPERIENCE

MyGovWatch.com / Lead Developer

2024–Present

- Building AI solutions to automate time-consuming manual processes like data entry.
- Supporting web scraping ETL pipelines that ingest high volumes of government contract data.
- Turning operational needs into product decisions and roadmap priorities.
- Coordinating work between third-party engineering teams while maintaining ownership of the codebase and infrastructure

LawCrawl / Founder

2022–2024

- Built an AI contract-analysis platform using agentic frameworks, vector RAG, evaluations, and fine-tuned models.
- Owned the full product lifecycle, from initial concept and product strategy through fundraising pitches, customer discovery, and rapid iteration based on investor and user feedback.

Trellis / Senior Developer

2022–2023

- Developed a hybrid legal-document search system combining vector similarity search with Elasticsearch keyword search, improving retrieval across a large repository of legal documents.

Proper Media, LLC / Senior Developer

2015–2022 • San Diego

- Co-designed and built a real-time-bidding platform including dozens of API integrations with ad exchanges.
- Built an AWS Lambda/Kinesis/Redshift/RDS data pipeline for high-volume bidding data and created internal dashboards and BI tools to visualize the data.
- Led monetization initiatives across high-traffic properties (Salon.com and Snopes.com) including video header bidding.

Youtily / Full-Stack Developer

2014–2015 • San Diego

- Built a digital marketing platform that helped small businesses improve local search visibility. Worked directly with founders on product strategy, features, and third-party integrations.

Norima Consulting / Developer

2012–2014 • San Diego

- Helped build an Electronic Medical Record system managing data for 95,000+ patients in a HIPAA-regulated environment.

AppNexus / Auditor, Creative Inventory

Oct 2011–Jul 2012 • New York, NY

- Performed quality assurance across a large inventory of internet display ads, validating creative assets and inventory quality.

NON-PROFIT WORK

Question Politics / Founder

2023–Present

- Founded a nonprofit aimed at increasing civic engagement
- Using AI to translate dense congressional bills into plain English and providing to tools to encourage users to dialogue with their representatives.
- Secured a \$100K/yr Google Ad Grant and managed Ads and Analytics to grow traffic and measure campaign performance.

TECHNICAL SKILLS

Languages & frameworks Python, Django, FastAPI, JavaScript/TypeScript, React, Angular, PostgreSQL, MySQL

Cloud & data AWS (Lambda, EC2, RDS, SageMaker, Kinesis, Redshift), Docker, Render

AI OpenAI/Codex, Anthropic/Claude Code, Hugging Face (local models), LangChain/LangGraph, Pinecone

Tools GitHub, JetBrains, Notion, Jira, Asana, Jupyter Notebook

EDUCATION

Lehigh University | B.S. Business Information Systems | 2007–2011, Bethlehem, PA • Business Plan Award Winner

INTERESTS Cooking • Camping • Gardening • Music Production • Sailing
